

## CALL FOR AUTHORS

We are currently looking for interested members to author an article in either of the following publications:

- **Energy Manager Today:** Open call for articles from IEEE Smart Grid members. Looking to work with IEEE Smart Grid members willing to write an article on any of the following topics: environmental issues, renewable energy, energy management/efficiency, climate, and/or sustainability practices, trends, or policies
- **Intelligent Utility:** Open call for authors on the following topics: Energy storage, Machine learning, Grid optimization, Big data/unstructured data/data science, Utilities and social media, NERC CIP, Drones, Grid system operations (ISO/TSO/DSO), Security/cyber security, Outage management/reliability/weather

**If you are interested, please email Angie at [a.rajski@ieee.org](mailto:a.rajski@ieee.org) by Wednesday, April 6th.**

In your email, please include an abstract (~500 words) providing an overview/angle/direction of the article.

Once we have the abstract in hand, we will work with the editor of the respective publication to secure it in an upcoming issue. We will also confirm article word count. If the editor green lights the article, you will then be asked to write the article in full by the deadline set.

As such, we welcome your interest and opportunity to showcase and promote you and IEEE Smart Grid in these publications.

Thank you and we look forward to hearing from you.
