

“Call for Participation by sharing your best practices in Smart Grid to increase the awareness for a Reliable, Resilience, Safe, Secure, Efficient and Sustainable Smart Electrical Power Grid”

Smart Grid Technical Activities Committee- “SG TAC” of “IEEE PES requests you to share your experience with the industry. Share on a global platform- any of your current research, project or initiative, news articles or presentations on Smart Grid- DS/TS, your experiences with it, challenges faced in its development and implementation, major benefits, case studies, any recommendations or lessons learned.

IEEE Smart Grid, Technical Activities Committee (IEEE SG TAC):

IEEE Smart Grid Technical Activities Committee, under the IEEE PES Smart Grid Initiative, works with a focus on new technologies that are close to adoption and deployment; Interact with Smart Grid stakeholders globally which may include Local distribution Companies, utilities, vendors, contractors and service providers (both IEEE and non-IEEE) on inter-disciplinary technical topics; and closely collaborate with the IEEE Smart Grid R&D Committee on tracking technologies that are becoming mature from a research perspective and with IEEE-Standards Association (SA) and Smart Grid Standards Committee in developing, updating and promoting related standards.

- **Chair** of IEEE Smart Grid, Technical Activities Committee: **Satish Saini**
- **Vice-chair** of IEEE Smart Grid-TAC, utilities and DERs taskforce: **Kaveh Aflaki**

Please contact with Dr. Kaveh Aflaki at Kaveh.Aflaki@smartwires.com to learn more or share your thoughts and best practices.
